Reference: Escauriaza-Seregin-Sverak, L^3 , ∞ , Russ Math Surv 58:2 2003.

Minimal: $\sup_{\mathbf{u}} \int_{\mathbb{R}^3} |\mathbf{u}|^3 = \infty$ continuation up to T . Contrapositive: $T^* = \lim_{\sup} \int_{\mathbb{R}^3} |\mathbf{u}|^3 = +\infty$.

Hence $C_L \text{ in } C_P \text{ ROVEN. } C_P \text{ ROVEN} = C_E \text{ weak, } C_L \text{ in main.}$
