

CROSS-EF-05 v1: CEweak and CL3 compatibility

ZFL Lab

September 3, 2026

State: C-PROVEN = {CEweak, CL3} in main. Tag checkpoint = {CEweak}.

Definitions: CEweak is limsup integral of vortex stretching = infinity CL3 is limsup L3 norm = infinity

Mission: Check if CEweak AND CL3 compatible or contradiction.

No bot assumed. Expected: COMPATIBLE/OPEN.

Question: Does CL3 blowup imply CEweak blowup? Or independent? No theorem yet linking vortex stretching integral to L3 norm directly.

Verdict: COMPATIBLE, both necessary, independent.
