

J-01-CX-geometric-depletion-kill-test v1: $W = |\omega|^2 \alpha$

ZFL-CX

September 3, 2026

$W = \int |\omega|^2 \alpha$, $\alpha = \xi^T S \xi$, $\xi = \omega/|\omega|$. C_J^{neg} : $\limsup \|\nabla \xi\|_{L^\infty} = +\infty$ PROVEN necessary.
KILLED as bridge: needs $\rho_0 > 0$, $\rho(t) \sim r_n \downarrow 0$, no $W_+ \leq f$ integrable.
